

# RLDatix Certified Professional for DatixWeb

Effectively design, implement and manage your  
RLDatix system.

The RLDatix Certified Professional for DatixWeb (DWeb DCP) is an advanced course that helps you realise the full potential of RLDatix. Upon completion you will be able to effectively design, implement and manage your system to support the needs of your organisation.

**The course uses a mix of learning methods to support you in building an incident management system according to best practice.**

## Who should attend this course?

This course is aimed at new RLDatix Administrators and those new to Risk, Governance and Compliance, whose team wish to benefit from a technically proficient professional, who has hands-on experience and in-depth knowledge of the latest best practice implementation techniques.

## What are the key benefits to you?

### STRATEGY

The DWeb DCP course allows you to go beyond simple daily management of your RLDatix system. By learning how to build a RLDatix system from scratch, you can align your own system with organisational strategies and initiatives, capturing more relevant data and creating better patient safety outcomes. Learn how to effectively deal with change management as and when required based on organisational priorities.

### BEST PRACTICE

Experienced, TAP certified trainers work with you to enhance your skills, ensuring your system configuration is and will continue to be managed in line with best practice initiatives. You can streamline capture of data, securing delivery of quality outcomes and improvements.

## What else does the RLDatix Certified Professional for DatixWeb course offer you?

### SECURITY

You will learn how to set up profiles, manage users and create security groups. Streamline data access by allowing staff quick and easy access to relevant information and ensure confidential data is only shared with appropriate staff members.

### CONFIGURATION

Adapt the system to your local requirements. Learn how to configure settings, design your own forms and determine field coding, with combi-linking of fields and dynamic form design.

### REPORTING

Easily create multiple reports according to the needs of your organisation. You will learn how to search and save queries, build and package reports and set up dashboards for fast and easy visibility of data for all reporting levels.

### DURATION

The course consists of two three-day training workshops split across a six-week programme. A break between training provides you valuable time to put your new skills into practice with your own RLDatix system and complete assigned project work. Experienced trainers are on hand throughout the entire course for any advice or assistance required.

### CERTIFICATION

Upon completion you will receive an industry recognised qualification, including a certificate and logo for use in email signatures. The DWeb DCP course will empower you to be confident in the data you are reporting, enabling you to support quality management and push the patient safety program within your organisation.
